Road Project Update
by Paul Browning, Public Works

11400 South/State Street Intersection: Final paving and striping will occur the last week of August with completion scheduled for the first week of September.

700 East Project: UDOT and Geneva Rock are more than half way through reconstructing the road between 9400 South and Carnation Drive (10010 South). Upcoming construction activities:
August - Traffic will switch to the east side of 700 East between 9800 South and Carnation when storm drains and utilities are replaced on the west side of 700 East. Traffic will travel on the east side of the new roadway bridge. Remember all businesses along 700 East are open and access to those businesses will remain open during the construction.

POMA: The pipeline is moving east on Wasatch Blvd. toward the Highland corridor. It will then go north to connect to the existing mainline vault which encompasses the valves. The Sandy City pipeline is also being installed alongside POMA. This advance planning allows for less disruption in the roadway by completing two projects at once. For more detailed information, visit www.pomapipe.com.
